Overview

The miniature power inductor with a special L-shape of external termination.
For the ADCC series, which are the AEC-Q200-qualified, automotive equivalent parts suitable for ADAS and Infotainment applications.
ADCC series can help improve the system efficiency and achieve a small form factor despite multi-phased outputs. Moreover, this product is specially designed for customer's use-cases that don't utilize an external termination on the top of the inductor.

Benefits

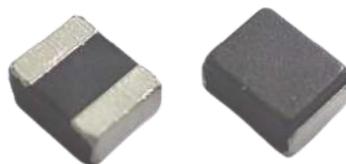

1. Automotive grade available
2. Energy Storage, Efficiently stores and transfers energy in DC-DC converters and power supplies.
3. L-shape of external termination.
4. Compact and Efficient Design, Advanced materials and construction enable miniaturization without sacrificing performance, ideal for space-constrained designs.

Applications

1. Automotive Systems for ADAS, infotainment, Head-up Displays (HUD)
2. Telematic Control Units (TCU)
3. Sensing ECUs for Cameras, Radar
