### Power Inductor Automotive Grade AWVF Series

#### Overview

Power inductors are passive electronic components used in various circuits to store energy in a magnetic field when electrical current flows through them. They are critical in filtering, energy storage, and noise suppression in power electronic systems.

They are designed to handle higher currents and are optimized for minimal power loss and thermal efficiency.

#### **Benefits**

- 1. Automotive grade available
- 2. No thermal aging
- 3. High current and efficiency, Magnetic epoxy sealing(Seme-shield)

#### **Applications**

- 1. Automotive Systems for Infotainment, MCU, Dashboard, CCD Module
- 2. Media player, Audio class
- 3. Net working, LCD Panel/TV,
- 4. Base stations, 5G infrastructure, and signal processing systems.
- 5. Telematics
